Balanced Vs Unbalanced Forces Physics

The most critical question in deciding how an object will move is to ask are the individual forces that act upon balanced or

Acces PDF

Balanced Vs

Unbalanced

unbalanced? The manner in which objects will move is determined by the answer to this

question. Unbalanced forces will cause objects to change their state of motion and a balance of forces will result in objects continuing in their current state of motion.

size, is known as an unbalanced force. In an unbalanced force, a body changes its position i.e. we can observe a moving object changing its direction, either increasing the speed or decreasing the speed and a body at rest starts to move and vice versa. What are the examples of Unbalanced Force? Practically anything that moves is a result
