Bearded Rectangle: The D80 takes one picture if you press the shutter and release it. The D80 takes photos at about three frames per second if you hold down the shutter. I use this mode because I have my choice of one or many shots depending on how long I hold the shutter. In dim light I hold it for many exposures so I can pick the best one later.

That's what I thought as well, but I have a EFS 18-135mmIS lens attached to my 80D camera now and the lens is set to AF and when my camera is in Manual mode, Tv, Av, and P it does not autofocus. I have to manually focus my lens to get the subject in focus. My lens autofocuses just fine when it is set in the other modes, C1, C2, Auto, etc...
