Herzberg's Two-Factor Theory of Motivation Herzberg's Two-Factor Theory of Motivation In 1959, Frederick Herzberg, a behavioural scientist proposed a two-factor theory or the motivator-hygiene theory. According to Herzberg, there are some job factors that result in satisfaction while there are other job factors that prevent dissatisfaction.

Herzberg's Two-Factor Theory of Motivation

Herzberg's Motivation Theory model, or Two Factor Theory, provides two factors that affect motivation in the workplace. These factors are hygiene factors and motivating factors. Hygiene factors will cause an employee to work less if not present. Motivating factors will encourage an employee to work harder if present.

Herzberg's Motivation Theory (Two Factor Theory)

Herzberg's theory could also be explained with Maslow's Hierarchy of Needs, where the physiological, safety and security as well as social needs belong to the Hygiene factors and the esteem and self-actualization needs fall into the category of Motivation factors.Maslow actually presented this idea, but did not deliver any data to support his claim.

Herzberg's Two-Factor Theory of Motivation - Human Business

Twentieth-century motivation expert Frederick Herzberg conducted research spanning several decades that highlighted an enduring truth: Motivation is not something that can be done to someone, using a carrot or stick approach that he called the "KITA method." Instead, genuine motivation comes from within a person.

Creating a climate of motivation for executives | HR Works

Frederick Herzberg (1923 - 2000) was a US clinical psychologist who later became Professor of Management at the University of Utah. His 'overriding interest in mental health' stemmed from his belief that 'mental health is the core issue of our times.' This was prompted by his posting to the Dachau concentration camp after its liberation.
