The two most widely-recommended treatments are antidepressant medications and psychotherapy. Most TBI patients will need a combination of medications and therapy before they see improvements.

### Brain Injury and Depression: Finding Happiness After TBI ...

Using chemical biomarkers released by the brain immediately after a head injury occurs, researchers can pinpoint when patients need urgent medical attention. This saves time in delivering vital treatment and avoids patients from undergoing unnecessary tests where no injury has occurred. The technique was developed by a multi-disciplinary team of researchers in the group of [...]
