The course material will include a large quantitative component; however, only a basic understanding of statistical and ecological principles is required, as is a general familiarity with the natural history and ecology of terrestrial vertebrates. Students will complete two major lab projects during the semester.

Teaching | Forester Lab

Vertebrate Paleozoology. Vertebrate paleozoology refers to the use of morphological, temporal, and stratigraphic data to map vertebrate history in evolutionary theory. Vertebrates are classified as a subphylum of Chordata, a phylum used to classify species adhering to a rod-shaped, flexible body type called a notochord. They differ from other phyla in that other phyla may have cartilage or ...
